

# AZAD MIRHEYDARZADA

## FULL STACK DEVELOPER

Baku, AZ1000 • +994 51 364 19 20 • azad.miri6@gmail.com • **WWW:** [linkedin.com/in/azadev](https://linkedin.com/in/azadev) •

**WWW:** [github.com/azadev3](https://github.com/azadev3)

### PROFESSIONAL SUMMARY

Passionate full-stack developer since childhood. Creator of my own [NPM library azadev/react-toastdev](#). I embrace challenges, learn through experimentation, and use AI as a mentor, not a tool. Always exploring, building, and improving.

### SKILLS

HTML5, CSS, Sass/SCSS	Bootstrap 5, Tailwind CSS
JavaScript (ES6+), TypeScript	React.js, Next.js (App Router & Server Components)
React Native / Expo	Redux Toolkit, Zustand, Recoil
React Query (TanStack), SWR	React Hook Form, Formik + Yup
Framer Motion, i18next, RiveApp	Node.js, Express.js, NestJS
MongoDB, PostgreSQL	JWT Auth, OAuth, Firebase

### KEY PROJECTS

- **Ekol QSC** – Full Stack Developer  
Developed the official website from scratch, including Admin Panel, Frontend, and Backend.
- **Kayı AUTO** – Full Stack Developer  
Built a full-stack car sales website with admin panel and complete frontend & backend development.

- **Emlakci** – Frontend Developer  
Created a home sales platform in the style of Tap.az / Bina.az.
- **Furqan Mebel** – Frontend Developer  
Built a furniture sales trading website.
- **Brendoo** – Frontend Developer

Developed an online sales platform for the Russian market.

## WORK HISTORY

### Full Stack Developer

166 Tech - Baku

02/2024 - 09/2025

- Designed and developed multiple large-scale web applications and admin panels from scratch using Node.js, Express.js, NestJS, React, TypeScript, and MongoDB; managed full project lifecycles including Figma-to-code implementation, testing, CI/CD processes, Git workflow, deployment, and distribution. Delivered both individual and team-based projects on time, covering e-commerce, corporate, portfolio, and single-page websites, while gaining extensive experience in multi-language support, API integrations, and full-stack development across front-end and back-end systems.

### Node.JS Developer

Renovar (Startup) - Baku

06/2023 - 11/2023

- This was a beginner's project, and I worked on the NodeJS side to gain experience. It was an old Meshcentral project, and the code in the project was very old. We reworked the old code and fixed any issues that arose through teamwork. During that time, I encountered Handlebars, pure JavaScript, and many other technologies.

### Front End Developer

JED Academy | Programlaşdırma Və IT Kursları - Baku

06/2023 - 09/2023

- I added new experiences to the ones I had already gained by developing React projects with the help of a mentor and teacher team.

## EDUCATION

No Degree: Student

Secondary School No. 71 - Baku

No Degree: Student

Baku Vocational Lyceum No. 2 - Baku

## LANGUAGES

English
